PROFESSIONAL SUMMARY

Final-year AI & Data Science Engineering student with hands-on experience in Python, SQL, Excel, and Power BI, built through an internship and several self-driven analytics projects. Comfortable taking a raw dataset through cleaning, analysis, and visualization to build dashboards and reports that support real decision-making. Looking for a data analyst role to keep growing those skills in a professional setting.

SKILLS

- Languages: Python, SQL, C, C++
- Libraries: Pandas, NumPy, Matplotlib
- Tools & Platforms: Excel, Power BI, Power Query, PowerPoint, MySQL, PostgreSQL, Jupyter Notebook, Visual Studio Code
- Core Areas: Data Analysis, Data Cleaning, Data Visualization, Dashboard Development, Reporting
- Soft Skills: Teamwork, Problem-Solving, Decision-Making

EDUCATION

Bachelor of Engineering, Artificial Intelligence & Data Science Engineering

Expected June 2027

Ajeenkya DY Patil School of Engineering, Lohegaon

Savitribai Phule Pune University | Pune, India | CGPA: 9.23

WORK EXPERIENCE

AI & Data Analytics Intern, TechnoGrowth Solutions Pvt. Ltd.

Jan 2026 – Feb 2026

- Cleaned and organized student performance datasets in Excel, using SUM, AVERAGE, and COUNT formulas to surface grade trends across classes.
- Built bar, pie, and line charts that made performance patterns easy to spot at a glance.
- Designed interactive Power BI dashboards with KPIs, slicers, and filters so stakeholders could explore the data on their own.
- Used Python for data cleaning, visualization, and reporting, turning raw academic records into insights the team could act on.
- Gained practical exposure to AI and data science workflows through day-to-day reporting work.

PROJECTS

Aadhaar Enrollment Analysis Dashboard

Power BI, DAX, Power Query

- Built a 3-page interactive Power BI dashboard to analyze 5M+ Aadhaar Enrollment records across states, districts, pincodes, age groups, and time periods.
- Cleaned and transformed data using Power Query and developed DAX measures for dynamic KPIs, demographic analysis, geographic analysis, and Enrollment trends.
- Designed interactive slicers, KPI cards, maps, trend charts, & top/bottom district analysis to identify enrollment patterns.
- Found the 0–5 age group contributed the largest share of enrollment, highlighting early-age enrollment dominance.

Pizza Sales Analysis

SQL, PostgreSQL

- Analyzed pizza sales data with SQL to track revenue trends, top-selling products, order patterns, and category-wise performance.
- Wrote queries using CTEs, subqueries, joins, window functions, and date/time analysis to answer specific business questions.
- Built analytical queries to flag top-performing pizzas, peak order periods, and revenue contribution by category.

GitHub: <https://github.com/Khushi-1005/pizza-sales-sql-analysis>

Student Profile & Digital Skills Analysis

Power BI, DAX, Power Query

- Built an interactive Power BI dashboard covering 664 student profiles across classes and divisions.
- Created KPI measures to track LinkedIn (93.7%), GitHub (85.5%), and coding-platform (79.2%) adoption rates.
- Cleaned data with Power Query and built DAX measures, slicers, and conditional formatting to identify digital-profile gaps at the student level.
- Found a 14.5-percentage-point gap between LinkedIn and coding-platform adoption, pointing to a clear opportunity to improve students technical presence.

Executive E-Commerce Sales Dashboard

Excel

- Built an interactive Excel dashboard to track revenue, profit, orders, product categories, and regional performance.

- Used pivot tables, pivot charts, slicers, and conditional formatting to turn raw sales data into an executive-ready report.
- Broke down category-wise and state-wise trends to support data-driven business decisions.
